DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-18, drawn to for use with a separation medium, classified in class 422, subclass 68.1.
 - II. Claims 19-24, drawn to a computer program, classified in class 702, subclass 19.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are distinct and independent inventions in that they are directed to different products. As a result, different and distinct searches will have to be performed. For example, the search required for Group III such as computer readable program code means of claim 19 is not required for Group II. Furthermore, Groups II and III can be considered as distinct and independent inventions since they have different classifications.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
